V-FRAME FOLDING SCAFFOLD TOWER

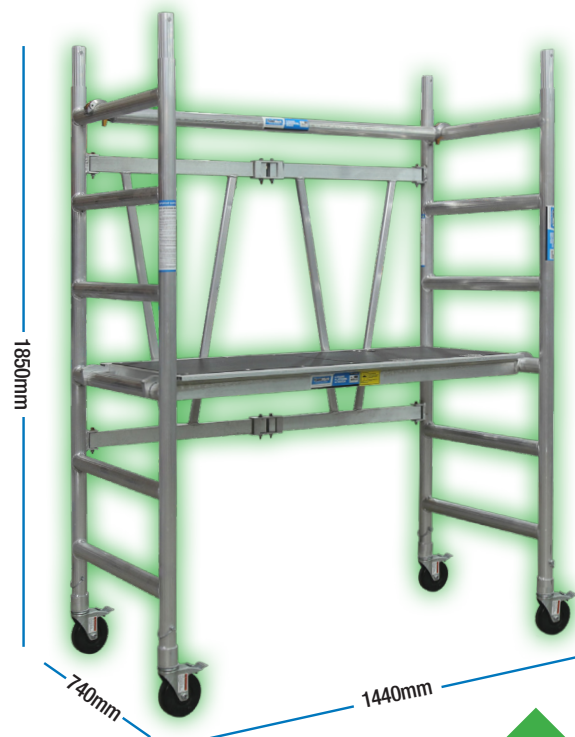

The **TradeMark V-Frame Scaffold** is a compact folding aluminium scaffold system. It is a versatile scaffold tower that suits both Trade and Domestic users as it is slimline in design, light and easy to assemble, and easy to manoeuvre on sites, dismantle and store. Additional packs are available to increase the height of the scaffold - the "Extension Unit" pack increases the working height to 3.8m and the "Tower Unit" pack increases the working height to 5.5m. It is manufactured to AS/NZS1576 Standards and NSW WorkCover Approved and Registered, and has a Safe Working Load of 225kg.
